

# SUPERFAN

**INTERACTIVE  
EXPERIENCE**

# BRAINSTORM

*come up with three different ideas of themes + interactive features*

# Idea 1: Roberto Lucha FanPage

## Theme

*Show how amazing roberto lucha is with an interactive fanpage displaying all aspects of his life*

### Interactive JS Feature #1

*When you click on Roberto you get a roberto lucha lore drop*

### Interactive JS Feature #2

*There's a list of years on the side and clicking on each one changes the photo to a picture of roberto from that year*

### Interactive JS Feature #3

*After you've heard all the roberto lucha lore you can enter a roberto lucha quiz*

## Idea 2: Bloodborne Tour Guide

### Theme

# Bloodborne™

*This site would have all of the bloodborne areas with a short overview of each one advertising why you want to visit*

#### Interactive JS Feature #1

*When you click on each area it will make the photo bigger and include lore*

#### Interactive JS Feature #2

*Each area will also have a photo of the are boss and clicking on it will play the boss track and display a short lore overview*

#### Interactive JS Feature #3

*Each area will have a video you can watch like an advertisement about it*

# Idea 3: Cave Story Interactive game

## Theme

*I would code the tutorial level of cave story and then maybe the first boss if I have time*

## Interactive JS Feature #1

*When you walk in the door it switched to a new scene*

## Interactive JS Feature #2

*The character would have movement controls with a jump and shoot*

## Interactive JS Feature #3

*When bumping into obstacles the character would die and the game would restart*

# EVALUATE

*think about the good and bad for each idea then choose one*

# Pros/Cons of Each Idea:

	Pros	Cons
Idea 1:	Its funny  Lots of interest in this subject	Roberto Lucha has to get final say in all details
Idea 2:	I am very interested in this  I think it would be really fun to make	Lots of research and work go into this
Idea 3:	Rewarding challenge  Unique  Something that other people could play and enjoy	This will be extremely hard and I will probably need to learn some coding for myself

# CONTENT

*gather and edit essential content for your site*

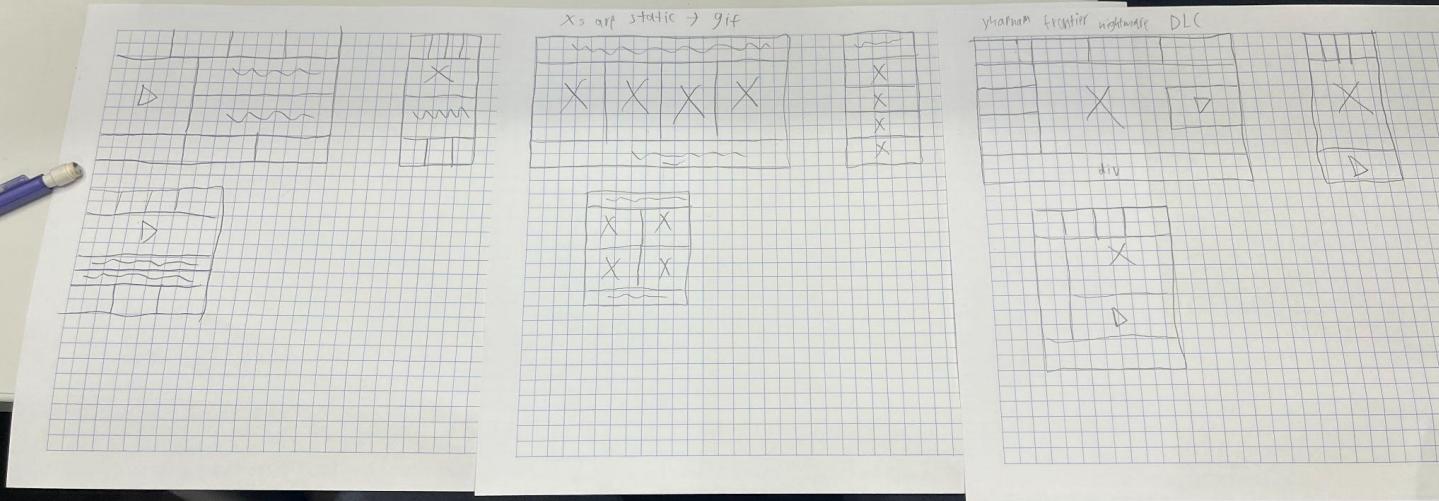

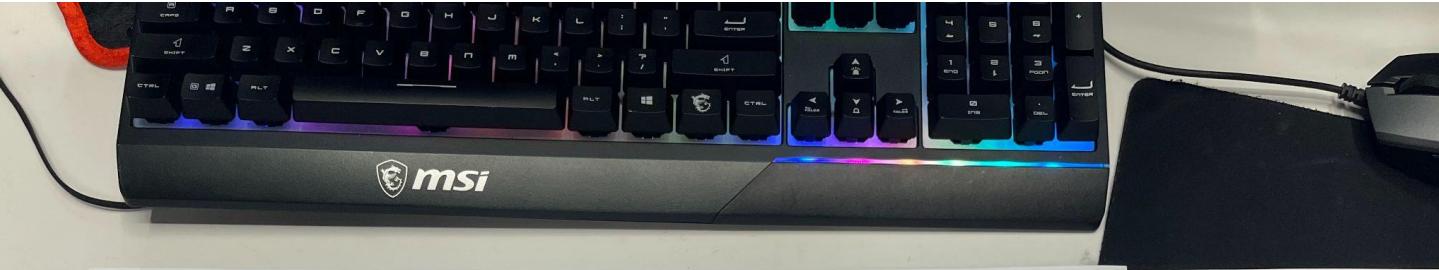

PIXLR®

# DESIGN

*create three possible responsive designs for your chosen idea*

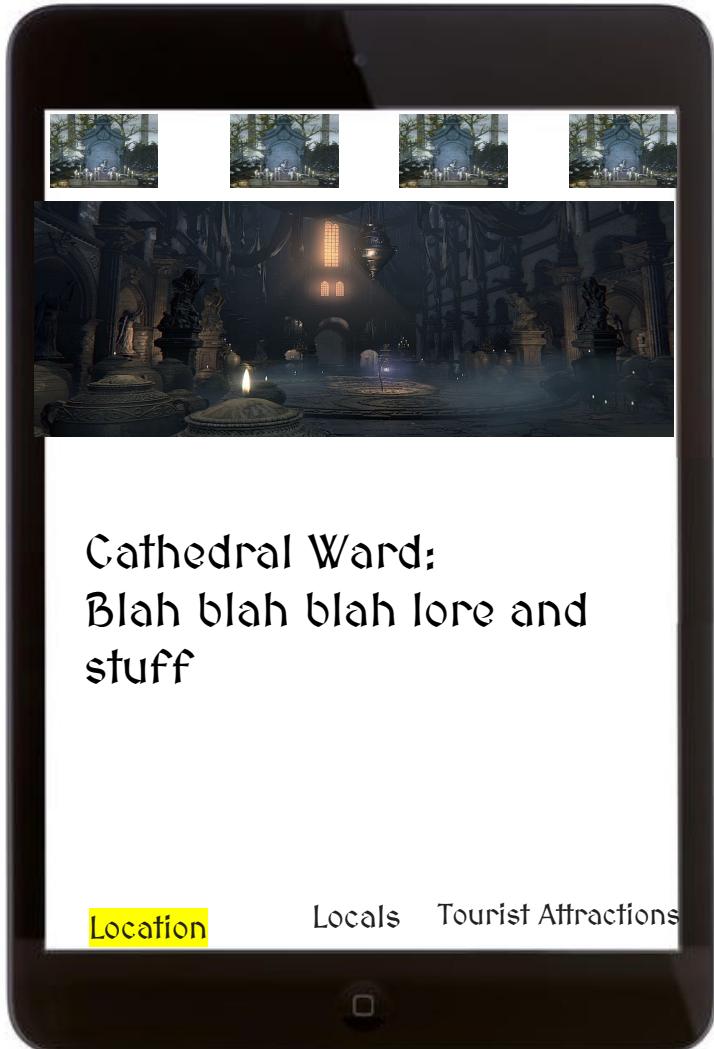

# MOCKUP

*choose your final layout and create a digital mockup*

Location Locals Tourist Attractions

Cathedral Ward:  
Blah blah blah  
lore and stuff

# ANNOTATE

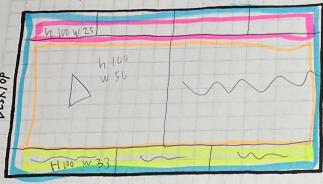

*add explanations, colors, percentages, and display properties + draw your dom*

# JAVASCRIPT

*add behavior to your page by inserting two pieces of javascript*

# ENHANCE UX

*add in effects when the user hovers and clicks to make the page intuitive and fun*

# TEST + ITERATE

*get feedback from users then make revisions to your user interface*

**UI Before Feedback (Screenshot / GIF)**

```

} else {
    document.getElementById("mainImg").classList.add("pink");
}

```

**What trends did you identify in your feedback?**

- Shorten theme song (I won't change this because the whole point is that it is permanent background music)
- Button sound effects
- Remove the pink
- Larger font
- Fix the mainText div not working causing text to be misplaced

**UI After Feedback (Screenshot / GIF)**

```

p {
    font-size: 7.5px;
}
p {
    font-size: 18px;
}

<div class="center-content slate small2 box2" id="mainText">...

```

**What changes did you make to improve your UI?**

**UI Before Feedback (Screenshot / GIF)**

```

} else {
}

```

```

p {
    font-size: 12px;
}
p {
    font-size: 9.5px;
}

<div class="center-content slate small2 box2" id="mainText">...

```

**What trends did you identify in your feedback?**

- Removed the Pink effect
- Made font larger
- Fixed mainText div
- Added button sounds
- 

```

<div class="center-content slate small2 box2" id="mainText">...
buttonSound.play();
var buttonSound = document.getElementById("buttonSound");

```
